SECTION 1 – REQUEST FOR PROPOSAL (RFP) OVERVIEW	3
SECTION 2 – SCOPE OF WORK / DESIRED FUTURE STATE	5
SECTION 3 – PROPOSAL FORMAT	10
SECTION 4 – INSTRUCTIONS TO RESPONDENTS	12
SECTION 5 – SELECTION PROCESS & EVALUATION CRITERIA	15

SECTION 1 – REQUEST FOR PROPOSAL (RFP) OVERVIEW

1.1 Duke Energy Overview

Duke Energy (NYSE: DUK), a Fortune 150 company headquartered in Charlotte, N.C., is one of America's largest energy holding companies. The company's electric utilities serve 8.6 million customers in North Carolina, South Carolina, Florida, Indiana, Ohio and Kentucky, and collectively own approximately 55,100 megawatts of energy capacity. Its natural gas utilities serve 1.7 million customers in North Carolina, South Carolina, Ohio and Kentucky. More information about the company is at www.duke-energy.com.

1.2 Purpose of RFP

Duke Energy Business Services LLC, as agent for and on behalf of Duke Energy One Inc., Duke Energy Carolinas, LLC, Duke Energy Progress, LLC, Duke Energy Florida, LLC, Duke Energy Indiana, LLC, Duke Energy Ohio Inc., Duke Energy Kentucky Inc, and Piedmont Natural Gas Company, Inc. is pleased to invite your organization to participate in this Request for Proposal ("RFP"). Companies in receipt of this RFP ("Bidders" or "Bidder" or "you") are asked to review the RFP and submit the requested information in response ("Proposals"). This RFP sets forth the requirements for submitting a detailed Proposal which shall include pricing and ability to comply with the requirements of the Scope of Work.

1.3 Wood Mackenzie (formerly PowerAdvocate)

Bidders are required to use Wood Mackenzie, an online bidding platform, to facilitate all Proposal communication and submittals. You have been provided with access to this online bid event ("Bid Event"), within which the associated RFP documentation and questionnaires are included. If alternate or additional individuals within your organization require access to this Bid Event, please contact the Bid Event coordinator, Kate Angina, at Kate.Angina@duke-energy.com. There are no license costs or usage fees to Bidders for use of Wood Mackenzie. It is the responsibility of Bidder to ensure that its Proposal is received by Duke Energy (that is, uploaded to the online Bid Event) by the due date and time. Questions regarding Wood Mackenzie use should be directed to: support@poweradvocate.com or 857-453-5800.

1.4 Contents of RFP

The following are sections of this RFP and, together with this document, collectively form the RFP documents. These documents are located on the "Download Documents" tab of the Bid Event.

Commercial Information

1. RFP Introduction (this document)
2. Duke Energy Master Consulting Services Agreement
3. Other commercial documents
 - a. Supplier Code of Conduct
 - b. Code of Business Ethics
 - c. Pricing Matrix

Technical Information

1. Detailed Technical Requirements
2. Third Party Risk Management Services Risk Profile

This document is both confidential and proprietary to Duke Energy. Respondent(s) may not duplicate, distribute, otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy.

1.5 RFP Overview

Residential Solutions (RS), a non-regulated business unit of Duke Energy Corp., administers and services home protection plans (HPPs) in a variety of home categories including utility lines, electrical, heating & cooling, and appliances. RS is seeking proposals for a technology solution and implementation services for the following:

- Development of native mobile app, along with a mobile web version including all integrations with Duke IT and any third-party
- Content management system to support promotions, content and products for the app
- Hosting services
- On-going support for maintenance and development on the platform

What to include:

- Provide detail where it matters.
- Provide relevant examples that clearly demonstrate the requirements identified.
- Answer questions concisely in the format in which they are requested.
- Present materials from prior comparable solutions that effectively demonstrate their capabilities
- Provide pricing in the format requested.

This Request for Proposal represents the requirements for an open and competitive process. By responding to this RFP, all Bidders agree to be bound by all the terms found in this document and all attachments. Bidder(s) chosen to move forward with the next steps of the process may be evaluated on evidence of the following criteria:

- Overall proposal suitability: proposed solution(s) must meet the scope and needs included herein and be presented in a clear and organized manner.
- Technical expertise and experience: Bidder(s) must provide descriptions and documentation of staff technical expertise and experience.
- Evidence that approach follows the industry's best practices, allowing for the understanding that best practices are constantly evolving.
- Business Practices consistent with Duke Energy's values and expectations for professional behavior.

SECTION 2 – SCOPE OF WORK / DESIRED FUTURE STATE

2.1 RFP Objectives

Duke Energy is seeking a technology solution and implementation services that support the following objectives:

- Develop a mobile app that provides self-service functionality for customers to book services for their home, maintain home inventory, DIY content and more
- Integrate to Duke Energy's enterprise systems via API's to validate/create customer accounts and enrollments, as well as process service bookings to existing applications
- Provide best practices on app development, customer adoption and engagement

2.2 Current State & Pain Points

2.2.1. Problem Statement

Residential Solutions currently has over 1 million direct service contracts and does not have a way to self-serve customers on our plans that need to have a home system repaired or replaced. Customers only have one, inconvenient option to request services or submit claims and are not given timely updates on the status of the jobs. Most HPP administrators have a customer facing self-service option for their customers.

2.2.2. Current State Business Process

Currently customers can only call a direct phone number to request service and have limited, inefficient ways to get updates and details for their plans. We are currently operating with very basic fulfillment and customer experience norms. Commerce and Dynamics systems are used as the system of record for customers enrolled on non-regulated Home Protection Plans (HPPs). The Business has no current API to share with App Dev partners to enhance the non-regulated customers experience with Home Protection Plans. Each of these systems has a contractor portal, where third-party contractors accept and track service orders for electrical, plumbing and home system repairs and replacements.

2.3 Technology Solution

2.3.1 Future State Process

To compete with the Home Services Contract market and to meet our customers' basic needs, we are planning to develop a User Interface/Native App to address not only these concerns, but also to offer seamless holistic experience to home management. Through custom APIs we should be able provide near real-time information sharing between a CX App and current/future systems. The long-term vision for this Home Services CX App includes white label functionality for utilities, service contract administrators and other service providers to use as a channel to reach customers in need of all types of home services.

2.3.2 Vision

Residential Solutions (RS) plans to create a comprehensive home management app that offers services, schedules appointments, energy tracking, predictive maintenance reminders, DIY help, warranty tracking, energy optimization, and community features. The app will have payment capabilities for customers to pay for services outside of their protection plans. The app will also integrate smart devices and provide emergency preparedness tools. IP ownership will belong to RS and the Development Partner will store it until RS is ready.

This document is both confidential and proprietary to Duke Energy. Respondent(s) may not duplicate, distribute, otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy.

2.3.3 Support and Maintenance

The app development team would need to provide support for after implementation as on-going maintenance and enhancements

2.3.4 Expected Volumes (across all businesses)

- Customer Contacts: currently approximately over 800K current customers have our Home Protection Plans
- We would like to increase customer acquisitions to non-native (non Duke/PNG customers) as well as our current Duke/PNG customers

2.4 Implementation Services

Duke Energy is seeking implementation services to complete the initial setup, configuration, testing, and go live support for the proposed technology solution to meet the requirements and objectives as outlined in all documents provided as part of this proposal package.

2.4.1 Implementation Approach/Assumptions

- The following capabilities are what we are looking to build within the app.

Unique Value

- Seamless Service Experience: "Book it, and they'll come" model.
- Comprehensive Concierge: Immediate support via live chat (mid-term goal), quick service booking, and vetted contractors.
- Education for First-Time Homeowners: Maintenance checklists, safety tips, and cost insights.
- Proactive AI-Driven Features: Predictive maintenance alerts, energy efficiency insights, and automated service recommendations.
- Utility Collaboration: Exclusive rebates, energy usage insights, and discounted services.

Core Features for Phase 1

- Home Service Scheduling
- Home Profile & Inventory
- My Account Profile & Dashboard
- DIY Tutorials & Library
- Payment processing

Scope Outline for Phase 1 should include Foundational Features:

- HPP Scheduling - Appointment Management
- Instant scheduling with concierge service and/or referrals
- Pre-qualified contractors, contractor marketplace
- Contractor ratings and reviews
- Contractor availability and job status dashboard
- Communication and updates, real-time
- Educational content and DIY resources, pre-visit education
- Payment integration and secure transactions
- Dynamic pricing and transparent estimates
- RS specific service bundling and subscription plans, consumable ordering
- Surge event notification and claims, Damage Assessment and documentation support

This document is both confidential and proprietary to Duke Energy. Respondent(s) may not duplicate, distribute, otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy.

- Home Profile & Inventory Features
- Home inventory creation, guided onboarding process, barcode and receipt scanning/uploading
- Centralized home management, track assets, appliances, furniture, systems and warranties
- Use this information to streamline repairs and service requests
- Personalized maintenance reminders and recommendations, warranty and maintenance tracking, advance maintenance log
- My Account
- Profile, consolidate subscriptions tied to utility accounts, communication preferences, order history, appointment reminders, payment preference and payment/order history, multi-home link to other premises
- Emergency preparedness with real-time alerts and recommendations
- Content, Likely will need to be purchased or created

Phase 2: Intermediate Features

- AI virtual assistant for troubleshooting common issues.
- Predictive maintenance recommendations based on inventory data.
- Real-time energy monitoring through utility integration.
- Gamification and rewards for achieving energy or maintenance goals.
- Enhanced Integrations to Utility programs; Demand Response, Home Energy Auditors, Solar, Clean Energy
- Home Improvement project plans and assistance.

Phase 3: Advanced Features

- IoT (Internet of Things) integration for smart home devices and automated service requests.
- Dynamic pricing and contractor availability matching.
- Advanced AI for home valuation, predictive trends, and highly personalized recommendations.
- Carbon footprint tracking and optimization tools leveraging utility and inventory data.

Implementation will include the design of environments and role-based security to meet Duke Energy business, compliance and regulatory requirements.

The list of the requirements and their description for the Mobile app can also be found in the separate file “Home App Requirements”.

As part of your response to this RFP, Duke Energy would also like to understand the providers’ recommended approach/methodology for implementation (e.g. agile, waterfall, hybrid, etc.).

2.5 Responsibilities

When responding to this RFP, please indicate which responsibilities will be carried out by the Technology Solution provider and which responsibilities will be carried out by the Implementation Services provider.

2.5.1 Provider Responsibilities

- Project Management
 - Detailed project planning with timelines, milestones, and deliverables.
 - Stakeholder updates and communications.
 - Risk and issue management and resolution.
 - Ensure there is coordination with Duke Energy staff for any functional or technical needs.
- Technology Solution Configuration and Setup
 - Configuration and customizations (as identified by Duke Energy).
 - Ensure any customizations are approved by Duke Energy.

This document is both confidential and proprietary to Duke Energy. Respondent(s) may not duplicate, distribute, otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy.

- Perform implementation in a manner that supports system integrity and future scalability.
- Documentation of configuration and customizations.
- Integration with Existing Systems
 - While Duke Energy will be responsible for integration via the Duke Energy enterprise data fabric, the implementation services provider will facilitate the integrations to achieve requirements.
 - Integrations to and from source should support a near real time method.
- Data Migration/Conversion
 - Develop a plan to migrate data from the current state technology solution(s) to the future state technology solution where applicable.
 - Execute a seamless data migration that ensures accuracy and integrity of data and does not disrupt ongoing operations.
 - Ensure pre and post go live data validation.
- Testing and Quality Assurance
 - Comprehensive test planning and execution including unit, system, integration, performance, and user acceptance to ensure system meets requirements.
 - Ensure scalability for future growth and expansion.
 - Ensure software will perform as expected at identified levels of usage.
 - Execute testing of system cutover in preparation for go live.
- Security and Compliance
 - Ensure Duke Energy cybersecurity requirements are met while developing the final solution.
 - Implement security to protect sensitive data.
 - Design and implement role-based security to meet Duke Energy requirements based on business and regulatory requirements.
- Training and Documentation
 - Provide user and administrative training
 - Provide comprehensive system documentation
 - Partner with Duke Energy resources on the change management strategy/approach.
- Go Live and Warranty Support
 - Develop and execute a cutover plan to ensure the system is functioning as designed and that users can operate it effectively.
 - Provide support during the go-live.
 - Provide post-implementation support for a specified warranty period after go-live.

2.5.2 Duke Energy Responsibilities

Duke Energy will provide resources as outlined below. When responding to this RFP, please indicate expectations/needs for Duke Energy roles and responsibilities from the providers' perspective.

- Project Management
 - Serve as a key point of contact for vendor support.
 - Oversee project budget and deliverable reviews.
 - Assist with resource, risk, and issues management, project planning, and stakeholder updates.
- Business SMEs

This document is both confidential and proprietary to Duke Energy. Respondent(s) may not duplicate, distribute, otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy.

- Assist with requirements, functional design, and testing.
- Technical SMEs
 - Assist with cybersecurity, solution architecture, and data.
- Data Integration
 - Duke Energy will be responsible for integrating data into the Duke Energy enterprise data fabric architecture.
- Data Integration will be a key input into the overall implementation timeline.

2.3.3 Project Timeline

Project Kickoff: Within 5 business days of contract execution. Our desired go-live timeframe is Q2-Q3 of 2026.

The following Milestone Schedule outlines an approximate timeline for key project phases and deliverables. Vendors are encouraged to review this schedule and propose their own version, which may include accelerated timelines or alternative milestones that better align with their capabilities and approach.

Milestone	Description	Due Date (from Kickoff)	Deliverable
1	Requirements Gathering & Finalization	5 Weeks	Finalized Requirements Document
2	UI/UX Design Completion	12 Weeks	Wireframes, Mockups, and Design Prototypes
3	Alpha Version Delivery	23 Weeks	Functional Alpha Build for Internal Testing
4	Beta Version Delivery	27 Weeks	Beta Build with Core Features for UAT
5	Final Release Candidate	31 Weeks	Fully Tested Application Ready for Deployment
6	Go Live & Deployment	39 Weeks	Application Deployed to App Stores
7	Post Launch Support Initiation	43 Weeks	Support & Maintenance Plan Activation

This document is both confidential and proprietary to Duke Energy. Respondent(s) may not duplicate, distribute, otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy.

SECTION 3 – PROPOSAL FORMAT

To help the review team evaluate proposals, please respond utilizing the following format. All relevant information regarding a topic area shall appear under the appropriate topic heading even if it appears elsewhere in your response.

Section A – Response Summary

Please include a cover letter which summarizes your proposal. The cover letter shall clearly identify the legal entity making the submission, and a single point of contact for further communication regarding the proposal. An e-mail address and telephone number for a specific individual must be provided.

Section B – Scope of Work Requirements

Bidder shall review and respond to the requirements detailed in the Scope of Work in this document.

Section C – Experience

Provide a description of experience with similar work and results achieved. Include any experience you may have with Duke Energy.

Section D – Management/Organization Structure

If awarded the contract for the services described herein, show how you would organize the management team and other personnel including roles, responsibilities, locations and key points of contact. Include an organizational chart and staffing plan to support Duke Energy. Include expectations for Duke Energy roles/responsibilities in your response to this RFP. Note any subcontracting that would be utilized and your relationship with any such vendors (tasks, vendor, duration, extent, work history, etc.)

Section E – Implementation and Duke Energy Support Plan

Provide the implementation plan and timeline you anticipate following in order to achieve results. Show any milestones or key deliverables. Describe recommended implementation approach (agile, waterfall, hybrid, etc.) in your response to this RFP. Provide a timeline for launch to be performed in conjunction with Duke Energy.

Section F – Detailed Technical Requirements

Address the Detailed Technical Requirements Questionnaire document attached to this RFP. Discuss any limitations and emphasize any core competencies. Discuss how your firm plans to meet the requirements listed as well as potential to deliver against long term needs. Provide responses to the Detailed Requirements and Experience document in an Excel formatted document.

Section G – Fee Structure

Please complete the Pricing Matrix template provided. Please ensure pricing is clearly broken down for Technology Solution, Implementation Services, and any Ongoing Support. Please provide any further explanation for the fees you have outlined in your pricing proposal.

Note: Please do not include any pricing information in any other section of your Proposal.

This document is both confidential and proprietary to Duke Energy. Respondent(s) may not duplicate, distribute, otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy.

Section H – Appendix (Optional)

This section is optional. Include any exhibits which may help to enhance your proposal. Reference each appendix here and label it clearly.

Section I - Supplementary Information and Questionnaires

In addition to the items listed above, please be sure to complete the following supplementary items

3.1 Master Service Agreement Review

Please review the Master Consulting Service Agreement and provide any redlines of terms for which your firm cannot agree. If your company has an existing Master Consulting Services Agreement with Duke Energy, you may upload the executed document. Please be advised that any MCSA not executed or updated within the last 1-2 years will likely require an amendment.

3.2 Wood Mackenzie Data Questionnaires

Complete questionnaires on the Commercial tab of the Bid Event. The fields in the questionnaires enable the review of summary information for each Bidder. Any in-depth or supporting information for these questions may be uploaded as separate attachment with corresponding document names. However, summarized responses to questions must still be entered within the questionnaire fields. Entering “see attached” or similar will not be considered a valid response.

3.3 Financial Statement

Please review section 4.9 and submit required financial statements,

3.4. Third Party Risk Management Services Profile Summary

Respond to the questions asked within the Third-Party Risk Management Services Profile Summary with complete answers. A more robust questionnaire may be required at a later date.

SECTION 4 – INSTRUCTIONS TO RESPONDENTS

4.1 Confidentiality and Ownership of Respondents

- 4.1.1** This RFP is both confidential and proprietary to Duke Energy. Respondents may not, and agree that they will not, duplicate, distribute, or otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy, which may be withheld for any reason within Duke Energy's sole discretion. Consent shall be granted only if provided by the Buyer, Procurement. Notwithstanding the foregoing, Respondents may make this document available to those employees who have a need to know its contents in order to participate in the preparation of a Proposal and who are bound by contract to keep it confidential.
- 4.1.2** Respondents shall not include or reference this RFP in any publicity without prior written consent from Duke Energy, which may be withheld for any reason, within Duke Energy's sole discretion and which, if granted, shall be provided only by the Buyer, Procurement.
- 4.1.3** Respondents shall not use or disclose to any third person any data, designs, drawings, specifications, or other information belonging to or supplied by or on behalf of Duke Energy. Upon Duke Energy's request, this RFP document together with all such confidential information, including any copies thereof, shall be returned to Duke Energy.

4.2 RFP Process

- 4.2.1** Duke Energy issues this RFP on the understanding that no charge will be made for the provision of a response to this RFP or for the provision of any information requested in this RFP.
- 4.2.2** All costs and expenses incurred by Respondents in any way associated with the development, preparation, and submission of responses, including but not limited to attendance at meetings, discussions, demonstrations, etc., and providing any additional information required by Duke Energy, will be born entirely and exclusively by the Bidder.
- 4.2.3** Duke Energy in its sole discretion reserves the right to modify the terms of the RFP or to terminate this RFP at any time.

4.3 Submission of Proposals

- 4.3.1** No orally transmitted Proposals will be considered.
- 4.3.2** All Proposals received will become the property of Duke Energy and will not be returned.
- 4.3.3** Alterations, qualifications, or omissions to the Proposal forms by the Respondent may be cause to reject the Proposal.
- 4.3.4** Submission of a Proposal is a representation and warranty of the Respondent submitting the Proposal that the Respondent has complied with all terms and conditions of this RFP.

4.4 Proposal Details

- 4.4.1** Proposals submitted are to INCLUDE all applicable excise taxes and tariffs, but shall EXCLUDE the federal and state taxes. Prices will be considered quoted in U.S. funds unless otherwise explicitly stated.
- 4.4.2** Respondents must be prepared to extend the same prices and terms and conditions to any organization affiliated with Duke Energy or which joins Duke Energy during the contract term.
- 4.4.3** In the case of a mistake in extension of price, unit price will govern.
- 4.4.4** Upon request from Duke Energy, Respondents will provide cost build up information for analysis by Duke Energy to ensure that the prices being charged are justifiable and within industry norms.

4.5 Pricing and Payment Terms

- 4.5.1** Prices will be considered quoted in U.S. dollars unless otherwise explicitly stated. Bidder must be prepared to extend the same prices to any organization affiliated with Duke Energy or which joins Duke Energy during the contract term. In the case of a mistake in extension of price, unit price will govern. Proposals are to include all applicable excise taxes and tariffs, but shall exclude the federal and state taxes. All Bidders shall be prepared, upon request by Duke Energy, to submit to Duke Energy a detailed breakdown of all costs.
- 4.5.2** Respondents must provide details of payment requirements together with any progressive payment options or quick payment discount options which will improve the overall cost impact of the Proposal to Duke Energy. Duke Energy's standard payment terms are net 90 days.

4.6 Amendments

- 4.6.1** In the event that a Respondent determines that an amendment must be made to a Proposal that has been submitted and provided that the closing date and time has not passed, the Respondent will be permitted to amend the Proposal.

4.7 Alternate Proposals

- 4.7.1** Respondents are encouraged to submit more than one Proposal if this will result in cost savings to Duke Energy. Alternate Proposals shall include the same level of detail as the primary Proposal.
- 4.7.2** Respondents may enter into partnership arrangements with other Respondents in order to supplement their Proposals or otherwise submit a joint response to the RFP. Any partnership arrangements must be clearly detailed in the response to this RFP.
- 4.7.3** If a bidder's proposal contains any deviations or exceptions, those deviations or exceptions must be specifically identified on a single separate attachment to the proposal in order to be considered in the evaluation. If not so identified, the deviations or exceptions will not be considered part of the proposal. Conditional proposals based on bidder-generated clarifications may not be accepted. If a bidder takes any exceptions in addition to those submitted in accordance with this section, that bidder's proposal may be rejected by Duke Energy.

4.8 Warranty Term and Details

- 4.8.1** Proposals must include full details of all guarantees and warranties offered in connection with the deliverables called for by this RFP, together with details of technical support services.

4.9 Financial Statements

- 4.9.1** Audited financial statements are required for evaluation of financial stability and capability of the Respondent. Submit financial statements with your RFP Package in accordance with the timeline mentioned.
- 4.9.2** Duke Energy reserves the right to obtain further credit references from other sources such as, but not limited to, Dun & Bradstreet, Better Business Bureau, and the Respondent's bank.
- 4.9.3** All financial statements and other financial or credit information obtained will be held in strict confidence and will only be used for the purpose of evaluating the Respondent for purposes of this RFP. Financial or credit information will not be released to any third party except as required by law.

4.10 Award of Contract

- 4.10.1** Proposals submitted will be irrevocable and open for acceptance for 180 (One Hundred and Eighty) days following the closing date.
- 4.10.2** The award of a contract, if any, shall be based on an evaluation of Proposals by Duke Energy, through consideration of any criteria deemed important by Duke Energy in its sole discretion.
- 4.10.3** Duke Energy reserves the right to award a contract in respect of all or only a portion of the Proposal or to award multiple contracts to different Respondents or to Respondents not included in this RFP process.
- 4.10.4** Duke Energy reserves the right to reject any or all Proposals received in response to this RFP without giving any notice or reasons. Duke Energy also reserves the right to accept any Proposal, notwithstanding informalities or irregularities contained in such Proposal.
- 4.10.5** The Proposal containing the lowest price or any Proposal will not necessarily be accepted. Duke Energy reserves the right, without restriction, of sole discretion in determining the best value and whether or not any Proposal received provides the necessary level of value to the company to result in the awarding of a contract.
- 4.10.6** Duke Energy reserves the right, in its sole discretion, to seek further information from, or clarification of, any Proposal submitted by any Respondent, and to negotiate with any Respondent, or with more than one Respondent concurrently, the terms and conditions of Proposals. Duke Energy is not required to offer any modified terms and conditions to any other Respondent and Duke Energy incurs no liability to any Respondent in exercising its discretion under this paragraph.
- 4.10.7** Duke Energy's decision with respect to the selection of the successful Proposal(s), if any, will be final. Once the decision has been made and the successful Respondent(s), if any, have been notified, Duke Energy will not accept modified Proposals from the unsuccessful Respondents or requests to reconsider the choice that has been made.

4.11 Contract Documents

- 4.11.1** The following documents may be included in the eventual contract(s), if any, between Duke Energy and the successful Respondent(s):
- RFP;
 - Proposal submitted by Respondent(s), including bid presentations;
 - Any written correspondence (clarifications) which may have been exchanged between the parties;
 - Duke Energy Standard Contract Forms;

SECTION 5 – SELECTION PROCESS & EVALUATION CRITERIA

5.1 About this RFP

This RFP is being issued to companies that may possess resources capable of meeting the aforementioned requirements. Duke Energy is seeking to identify qualified, safe, and value-minded firms that can either perform all areas in the scope of this project or who can partner with others to provide the desired solution. Duke Energy will differentiate between respondents on the basis of their responses.

5.2 Respondents' Questions

Duke Energy will hold a 90 min Q&A conference call which each bidder to assist with questions and scoping. Respondents will also have the opportunity to submit questions regarding RFP via the Wood Mackenzie messaging tool. Additional information regarding the details of the conference call will be provided will be agreed upon with participants who will submit their Intent to Bid. All updates will be provided through the Wood Mackenzie messaging tool. Please submit any additional questions by September 22, 2025, by 5:00 Pm EDT. Any additional questions can be asked through the Wood Mackenzie messaging tool on an as needed basis.

5.3 Key Dates

Milestone	Date
RFP Opens	Tuesday, September 2, 2025, at 8:00 am EDT
Submit Intent to Bid & Submit Requested Times to meet with Duke Energy for Q&A to assist with scoping	Thursday, September 11, 2025, by 5:00 pm EDT
90-minute Q&A session with Duke Energy to assist with scoping Duke Energy will provide dates/times for this session to each individual bidder	Friday, September 12, 2025 through Thursday, September 17, 2025
Deadline for submitting additional questions related to the RFP	Monday September 22, 2025, by 5:00 pm EDT
Proposals due	Tuesday, September 30, 2025, by 11:45 PM EDT

5.4 Bid Proposal Requirements

The firm shall be responsible for submitting their bid via Wood Mackenzie. All proposals must be entered electronically. The redlined Master Consulting Services Agreement, Pricing Matrix, and RFP Questionnaire shall be submitted as attachments in Microsoft Word or Excel format. Any other attachments can be submitted in Microsoft Word or Adobe PDF. Bids must be submitted no later than September 30, 2025 at 11:45 Pm EDT.

Proposals shall be valid, binding and irrevocable for one hundred and eighty (180) Business Days (as defined below) from September 30, 2025. For the purposes of this Request for Proposal, a "Business Day" shall mean any day on which the Federal Reserve member banks of New York, New York are open for business, except for Saturdays, Sundays, or Holidays. Each proposal will be evaluated on technical and commercial merits. Duke Energy is under no obligation to award the work on a single factor, or to award the work at all. All proposals will be opened on the due date. All information provided to firms as part of the RFP process is considered confidential.

All requests for clarifications, interpretations or decisions on discrepancies pertaining to any of the proposal documents or related project data furnished as part of the proposal documents shall be made via Wood Mackenzie. It is the Bidder's responsibility to advise his potential subcontractors, vendors, and other sub-vendors that

This document is both confidential and proprietary to Duke Energy. Respondent(s) may not duplicate, distribute, otherwise disseminate or make available this document or the information contained in it without the express written consent of Duke Energy.

information will be available only through the Bidder and that no direct contacts with Duke Energy by other firms shall be initiated. Information exchange shall be between Duke Energy and Bidder, and Bidder and his potential subcontractors. No work shall be subcontracted without the approval of Duke Energy. Subcontract work and proposed subcontractors must be identified in Bidder's proposal.

Duke Energy hereby reserves the right to modify or withdraw this invitation, waive informal technicalities and/or irregularities, to accept or reject any and all proposals for any reason, terminate any subsequent negotiations at any time, as determined to be in the best interests of Duke Energy in its sole and absolute judgment. In addition, Duke Energy reserves the right to make inspection(s) of the awarded Respondents' facilities involved, and to further negotiate the terms and conditions of Bidder's proposal(s) or to award or not award the contract(s) and/or purchase order(s) on the basis of the proposal(s) as submitted, without further discussions, negotiations and/or explanations.

5.5 Single Point of Contact (SPOC)

All communication with Duke Energy must go through the Wood Mackenzie web tool, not through the Sourcing contact, to maintain a fair and transparent process. Questions will then be distributed to the appropriate person for a quick response. Attachments or exhibits may be included to supplement or elaborate response to questions. All supporting documentation and manuals that will be submitted in response to this RFP will become the property of Duke Energy unless otherwise requested by Respondent(s) at the time of submission.

The Sourcing contact for exceptional circumstances is:

Kate Angina
Title: Sourcing Specialist
Kate.Angina@duke-energy.com

5.6 Exceptions

If a Bidder's proposal contains any deviations or exceptions, those deviations or exceptions must be specifically identified on a single separate attachment to the proposal in order to be considered in the evaluation. If not so identified, the deviations or exceptions will not be considered part of the proposal. Conditional proposals based on Bidder-generated clarifications may not be accepted. If a Bidder takes any exceptions in addition to those submitted in accordance with this section, that Bidder's proposal may be rejected by Duke Energy.

5.7 Addenda

Duke Energy reserves the right to amend or clarify requirements herein by Addenda. These may be issued at any time prior to the date for receipt of proposals and may be mailed or otherwise delivered to all Respondents who have been invited to bid. Request by a Bidder for extension of the proposal due date shall be received by Duke Energy at least one week prior to the then scheduled date. If revisions or clarifications are of magnitude to warrant, in the opinion of Duke Energy, the extension of the date set for receipt of proposals, an addendum will be issued announcing the new date. Failure of a Bidder to acknowledge receipt of any addendum in the space provided on the proposal form may result in rejection of that proposal.

For Respondents who choose not to respond to this solicitation, Duke Energy respectfully requests they submit a response indicating "No Bid" with an explanation for their inability to supply an offer.
